

INTERNATIONAL BIODETERIORATION RESEARCH GROUP

Wet State Preservation Group: Annual Report 2023

Report No: IBRG IBRG WPG 24/004 Date: November 2024

The Wet-State Preservation Group held two meetings during 2023 with international delegates from industry, academia, and testing institutions in Spring (15 participants) and Autumn (18 participants).

The primary work of the general WSP group was regarding the development and finalization of methods for industry related to efficacy testing in paints and polymer emulsions which was then planned to publish in 2024.

The method for curative efficacy which can be used for BPR registration was also finalised.

Appropriate Tier 2 conditions for several applications were discussed and introduced to ECHA.

Monika Lamoratta Chair Person of the Wet State Preservation Group, April 2023
